Homework 05 of course Computational Geophysics

11930721

冯旭平

---

1. src

"src" directory Contains the C++ source code for advection modeling for 1D and 2D cases.

---

2. bin

There are two executable programs in the directory "bin" modeling advection for 1D & 2D cases.

---

3. data

Some input parameters file.

---

4. doc

Report file (PowerPoint) and Python scripts for exploration of modeling.

---

5. script

Visualization of 2D advection with MATLAB.
